

ETHICAL CAPITAL.

Expanding the Horizon

A \$5.5 trillion global framework — not a niche product.

\$5.5T → \$9.75T

by 2029 · 10% CAGR
14.9% growth in 2025

Ethical finance is a global system for deploying capital according to deeper principles — fairness, transparency, real economic participation, and the avoidance of interest-based exploitation.

It is not limited to any religion. Islamic finance, ESG investing, impact capital, and values-aligned institutional investing all share the same foundation.

Capital comes from:

- Sovereign wealth funds & national development institutions
- ESG-aligned pension funds and asset managers
- Faith-based family offices and charitable endowments
- Impact investors · High-net-worth values-aligned individuals

"Ethical finance is becoming mainstream, appealing to ethical investors globally — regardless of religion or region."

Real estate & infrastructure dominate at ~88%

Nigeria's energy contractors, mineral suppliers, and construction firms on local content contracts cannot access ethical capital.

Local content financing in industrial sectors

Contract-backed, asset-secured financing for indigenous African businesses executing contracts with multinationals – within national local content frameworks.

METRIC	REAL ESTATE	LOCAL CONTENT
Capital cycle	3–15 years	60–270 days
Economic multiplier	Low (concentrated)	High (SME-distributed)
Shariah fit	Complex Ijarah / Istisna	Natural Murabaha / Wakalah
Local content	Minimal	100% by definition

SOURCE: Standard Chartered 2025 • FSB 2025 • ICD-LSEG IFDI 2025

Local content financing delivers superior outcomes.

Local content financing deploys capital to indigenous African businesses executing confirmed contracts with multinationals — in energy supply chains, mineral extraction, and construction. The obligor is a multinational buyer. The asset is a confirmed receivable.

01

Real estate & infrastructure

- Capital cycle: 3–15 years
- Benefits large corporates only
- Economic multiplier: Low
- Local content benefit: Minimal
- Shariah fit: Complex structures

~88% of all ethical capital today

02

Generic industrial finance

- Capital cycle: 1–3 years
- Benefits larger firms (often foreign)
- Economic multiplier: Medium
- Local content benefit: Variable
- Shariah fit: Possible, not optimised

A fraction of ethical capital

03

Local content financing ✓

- Capital cycle: 60–270 days
- Benefits: African SMEs in LC frameworks
- Economic multiplier: Highest
- Local content benefit: 100%
- Shariah fit: Natural Murabaha / Wakalah

Currently near zero ethical capital

COUNTRIES THAT REDIRECTED ETHICAL CAPITAL TOWARD LOCAL CONTENT SAW DEMONSTRABLY BETTER OUTCOMES.

The question is not whether ethical capital can work in industrials — it can. The question is whether it is directed toward LOCAL CONTENT specifically.

MALAYSIA 31.4% of all trade finance now Shariah-compliant Bank Negara Malaysia channelled ethical capital into oil & gas supply chain SMEs — local content contractors. Murabaha and Wakalah were structured for purchase order and receivables financing for indigenous energy sector businesses. Outcome: Malaysian energy and industrial SMEs gained financing access. Local content value retained domestically.	INDONESIA 46.2% of Islamic bank lending flows to industrial procurement Indonesia mandated Islamic banks to target MSMEs in energy, agriculture, and commodity sectors within local content frameworks. Murabaha covers 46.2% of all Islamic bank lending — primarily industrial procurement chains. Outcome: 50m+ SMEs accessed ethical capital. Productive sector growth measurably outpaced real estate returns.	TURKEY \$150M Murabaha facility for local industrial reconstruction The ITFC deployed a US\$150M Murabaha facility for local industrial businesses — procurement of energy equipment, construction materials, and supplies for 220,000+ indigenous businesses. GTR Best Deal of 2025. Outcome: Local industrial capacity rebuilt via ethical structures. Proved Murabaha works at scale for local content.

Four instruments purpose-built for local content financing.

Murabaha alone constitutes 80–95% of all Islamic bank financing globally. Each instrument maps directly to a local content financing scenario.

MURABAHA — Cost-plus sale

Energy · Minerals · Equipment · Materials

The financier purchases goods on behalf of the local content contractor and resells at a disclosed markup. No interest. The contractor repays on a deferred schedule aligned to the contract payment cycle.

↳ The underlying asset is the contract. The obligor is a multinational buyer.

WAKALAH — Agency model

Capital deployment · Co-execution · Receivables

The investor appoints Moneda as agent (Wakil) to deploy capital into defined local content transactions. Moneda executes, manages risk, and returns capital plus agreed profit share.

↳ Moneda acts as Wakil — executing the contract as agent for the ethical capital investor.

SALAM — Forward commodity sale

Crude oil · Chrome · Ferro vanadium · LNG

Capital is paid upfront for future delivery of a commodity — price, quantity, grade, and delivery date fixed in advance. The local content producer receives immediate working capital.

↳ Mineral and commodity extraction within LC frameworks has predictable delivery cycles.

ISTISNA — Construction & manufacturing

EPC contracts · Pipeline · Processing plants

A contract for manufacture or construction of specific assets — crude export pumps, pipeline components, processing plants. Payment staged against verified milestones.

↳ Nigerian local content requirements in oil & gas and construction are largely EPC-based.

HOW MONEDA FUNCTIONS AS THE ETHICAL CAPITAL FUNNEL

Confirmed local content contract

1

A multinational awards a contract to a Nigerian SME within the national LC framework. USD-denominated with a creditworthy buyer.

Moneda acts as Wakil (agent)

2

Ethical capital investor deploys through Moneda under a Wakalah structure. Moneda structures a Murabaha or Istisna facility against contract receivables.

Capital deployed, contract executed

3

Moneda co-executes — managing operational risk, supervising delivery, maintaining control over the receivable.

Multinational pays — capital returns

4

On contract completion the multinational pays. Capital + profit share returned within 60–270 days.

**Ethical capital
belongs in
local content.
Moneda is
the funnel.**
